### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 25 July 2003.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_.

## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election with traverse of Group I in Response filed 7/25/2003 is acknowledged. The traversal is on the ground(s) that "the process could also be used to make a non-phosphate ceramic. However, each of claims 5-15 requires, *inter alia*, a calcium-phosphate-based ceramic as do claims 1-4." (Response, page 2, bottom paragraph). This is not found persuasive because the method steps in claims 5-15 appear nominal and conventional. Alternatively, the Examiner notes that Group I of claims 1-4 is either anticipated by or obvious over JP 60-124587 (Derwent Abstract). As such, the product as claimed can be made by another and materially different process (MPEP § 806.05(f)).

The requirement is still deemed proper and is therefore made FINAL.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

### *Claim Rejections - 35 USC § 103*

Art Unit: 1771

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over JP 60-124587 (Derwent Abstract).

JP '587 relates to a porous calcium phosphate compound of hydroxyapatite which has a Ca/P of 1.3-1.8, porosity of 40-90%, and pore diameter of 1-600 microns. Although JP '587 discloses a narrower range of pore diameter, it is noted that JP '857 teaches a calcium phosphate compound for essentially the same application as the instantly claimed invention, i.e., a biocompatible artificial material. As such, it is believed that a suitable pore diameter is either inherently disclosed by JP '587, or an obvious optimization to one skilled in the art, motivated by the desire to improve biocompatibility.
